

## **Project - Part 2: Touching Base (10 points)**

**Submit what you have so far so I can give you feedback.**

Zip the following into the folder called Project Part 2 on the Assignments Tab on D2L.

Only one person in each group needs to submit.

1. Submit all code (or a link to code)
2. Submit a document stating who has worked on what so far. If someone has not done work up to now they will receive a 0 on this part of the assignment. If it is not equally distributed they will receive less points than their team member(s).
3. A document explaining the project and what has been done so far.
4. Optional Lesson Plan or other documentation/handouts you will be using.

Note: To receive full credit – you must have something to show at this point, even if it is not fully completed I want to see that there have been parts that you have been actively working on it. There should be enough that I can give you feedback and let you know what I still expect.
