

Accessibility Assignment

Choose **one** disability: ex. hard of hearing, visually impaired, autistic, elderly, etc.

Do some research and write 1 full page:

1. Discuss technologies that are currently out there to assist individuals with that disability.
2. What suggestions do you have on designs for the future that do not yet exist?
3. This must be in your own words. You can cite articles appropriately but you need to use your own words. Plagiarism will be checked.

Submission: Submit to the D2L folder in the Assignments tab titled Accessibility – please note that D2L checks for **plagiarism** and if it is not in your own words you will receive a 0 for this assignment.
