

*Assignment:*

*Install Android Studio and create your first project.*

1. Go to **Resources tab and installation instruction** for a full description on how to Install Android Studio, Create your Hello World Project, Run it on the emulator.
2. Go to app > resources > layout > activity\_main.xml  
Click on the design tab to see Hello World on the screen. (Design shows the image and the text tab shows the text for the xml file.)
3. Go back to the text tab, and in the xml **modify** Hello World to say anything else rather than Hello World! (You can try other things as well!)
4. View it on the emulator! If have an android device and would like to use that instead of the emulator (it is faster), go to **Resources tab** and look at the instructions on running it on your Android device.

**Submission through the dropbox on D2L.**

1. In an explorer window find the directory which has your project. Zip it and submit through the dropbox.
2. In addition attach a screenshot (or video) of your project working on an emulator, phone, or tablet.
