

**Assignment 2:**

1. Go to the dropbox titled Calculator and open the zip file. Extract it to a location of your choice. Run it. You will see that this program calculates the average of 2 grades.
2. Modify both the layout and java code to do some other kind of calculation which you think would be cool and convenient as an app (calculator, tip calculator, anything you'd like!)
3. Zip the project back up.

**Submission:**

Go back to the dropbox titled Calculator and submit the following:

- a. The new zipped code
- b. Screenshots (at least 2) or a video of the program running on a phone or emulator
