Multiple Activities Assignment:

Create any app and add a second screen to it. (Or you may update your calculator from last week if you'd like.)

To receive full credit you **MUST** include a new Widget we have not yet used somewhere in your app (in other words, something other than TextView, Spinner, Button, and EditText)

Submission:

Go to the dropbox titled MultipleActivities and submit the following:

a. The new zipped code

b. Screenshots or a video of both screens running on a phone or emulator
